Christian Pardillo Laursen

Education

2017-2020 **BSc Computer Science**, *University of York*, First Class Honours (with Distinction).

- 3rd Year - 88.5%
  IET Award
  Dissertation: Integrating Theorem Proving with Computational Algebra Systems
  Wrote a plug-in for the Isabelle theorem prover that allows it to obtain symbolic solutions to ordinary differential equations.
  - Concurrent Systems Analysis and Verification - 99%
  - Data-Oriented Specifications & their Analysis - 97%
  - Fundamentals of Machine Learning - 91%
- 2nd Year - 85%
  Departmental Award for Best Performance in the Second Year
  - Implementation of Programming Languages: 100%
  - Software Engineering Project: 87%
- 1st Year - average: 78%
  - Theory and Practice of Programming: 90%
  - Numerical Analysis: 82%
  - Business Innovation and Entrepreneurship: N/A

Experience

June–August 2020 **Research intern**, *YorRobots, University of York*.
Project aiming to produce a case study in the verification and implementation of a robot controller in Isabelle/UTP

Skills

Languages Fluent in Spanish, English and Danish. B1 in German.

Programming Experienced in Haskell, Python, Java and a variety of other languages.

Computing theory Experienced in the design and analysis of algorithms in various areas of computer science, as well as system modelling and refinement.

Linux Adept at using the terminal and a wide range of utilities to manage Linux systems and work efficiently.

Interests

Independent study Currently learning about dependent types, category theory, and other topics in computing and mathematics, with focus on their application to computer science.

25 Bedale Avenue – York YO10 3NG
07716 430594 • *christiansfd@protonmail.com*

Projects
- Scripts to automate common tasks and improve my workflow.
- *Advent of Code*
- Chess engine
- Neural networks from scratch
- Creating tweets in the style of a user with Markov chains
